What do we do?

DEVELOP TECHNOLOGY

Our team designs, manufactures, and innovates life-transforming hypochlorous acid products with the aim to make it financially and socially accessible.

TRAINING & SUPPORT

We provide services that assist users with effectively using our products to its fullest potential.

TRANSFORM LIVES

Our work is more than just providing products and services. We seek to see transform lives and create social impact.

Our Technology

Hypochlorous acid's effectiveness as a disinfectant arises from its potent oxidizing properties, which efficiently disrupt the cellular structures of microorganisms, rendering them harmless. Additionally, its non-toxic nature makes it safe for use in various applications, including wound care and surface disinfection. With its broad-spectrum antimicrobial action, rapid pathogen neutralization, and absence of harmful residues, hypochlorous acid is well-suited for diverse scenarios.

United States Environment Protection Agency (EPA) has endorsed Hypochlorous acid as a disinfectant safe for use against COVID-19[1]. A scientific study on bacterial load demonstrated more than 99% reduction of pathogens 20 minutes after the application of HOCl(Hypochlorous acid)[2].

Medical-grade hypochlorous acid has a shelf-life. It is also expensive and unaffordable for the most vulnerable patients in the developing world. We developed a simple yet cost-effective H2autO Hypochlorous System that was first designed by Duvon McGuire. The System can produce affordable and life-changing hypochlorous acid on-site using a simple and accessible technology.

Wound Care Products	<ul style="list-style-type: none">• Wound cleaners and sprays for effective wound management.

VidaPure

Hand Sanitizer

VidaPure™ is a hypochlorous hand sanitizer designed to effectively combat bacteria and germs on hands. Unlike traditional hand sanitizers, it leaves no residue, ensuring a clean and comfortable feel after each use. VidaPure™ efficiently eliminates harmful microorganisms commonly found in the immediate environment, providing a reliable defense against potential infections. The product's formulation balances efficacy with gentleness, making it suitable for regular use without causing irritation or dryness.

Whether in public spaces, healthcare facilities, or daily routines, VidaPure™ offers peace of mind by promoting optimal hand hygiene, maintaining cleanliness and protection against a variety of pathogens.

Available sizes: 100 ml and 500 ml

What sets VidaPure apart?

Hypotonic

With a hypotonic solution, we provide a gentle yet potent disinfection process, making our products suitable for various applications without causing harm.

Residue Free

Our products guarantee a residue-free finish, leaving surfaces clean and ready for immediate use without any leftover residue.

Pain Free

Our products ensure a pain-free experience and are suitable for various applications without causing discomfort.

Unbuffered

Our technology ensures unparalleled purity, guaranteeing the most effective disinfection without compromise.

Cruelty Free

Committed to ethical practices, our products are cruelty-free, reflecting our dedication to both effectiveness and compassion.

VIDAGUARD

VidaGuard

Surface Disinfectant

VidaGuard™ is an innovative hypochlorous-based disinfectant formulated to provide unparalleled protection for surface areas, contact points in the environment and medical equipments. Engineered to combat the spread of bacteria, germs, and viruses, it serves as a vigilant guardian for homes, public spaces, and medical facilities alike. VidaGuard™ effectively neutralizes harmful microorganisms, creating a robust shield against potential infections, helping to ensure a safer environment for all.

The advanced formulation is designed for maximum efficacy while remaining gentle on surfaces and safe for use in various settings. VidaGuard™ provides peace of mind by delivering thorough disinfection without leaving behind harmful residues or compromising on safety.

Available sizes: 1 Litre and 3 Litre

What sets VidaGuard apart?

Unbuffered

Our technology ensures unparalleled purity, guaranteeing the most effective disinfection without compromise.

Cation and Bleach Free

Our products are free from harmful cations that can compromise effectiveness, ensuring thorough and safe disinfection. In addition, we offer a bleach-free alternative, providing powerful disinfection without the harsh chemicals associated with bleach.

Stabilizer Additive Free

No stabilizers are added, ensuring the utmost purity and effectiveness in every application.

Residue Free

Our products guarantee a residue-free finish, leaving surfaces clean and ready for immediate use without any leftover residue.

Cruelty Free

Committed to ethical practices, our products are cruelty-free, reflecting our dedication to both effectiveness and compassion.

Why partner with us?

Empowering Wellbeing

Our primary goals extend beyond financial metrics and are centered on promoting the well-being and health of our community.

Reaching The Unreached

The purchase of our products directly translates into tangible support for under-resourced and marginalized communities through our targeted social impact initiatives.

Global Transformation

We drive transformative change at scale, positively impacting lives through hypochlorous solutions, facilitated by our global community of partners.

Ways to partner

Be the face of our solutions on the ground. We work together to deploy, test products and educate users.

Organizations that already have a network that we can deliver our solutions through.

Has the ability to make a financial investment to manufacture and deliver affordable hygiene and wound care solutions.
